EXPERIENCE

Software Engineering Specialist
GE Digital
📅 07/2017 - Ongoing   📍 Bangalore

As a software development engineer, I am working with GE Predix team following agile methodology to deliver web and mobile applications for various industries to manage their assets.

- Working on the development of SAAS application which optimize the performance of assets to increase reliability and availability, minimize costs, and reduce operational risk
- Working on adding new features and performance improvement
- Working on the development of REST APIs and User Interface layer
- Using KO to help us with view model and view binding
- Using Apache Cordova for development of mobile app
- API testing/Integration testing

PROJECTS

Minquora
- Designed a QnA webapp supporting user profiles, tags, likes, upvotes, downvotes, comments, followers etc
- Technologies Used: HTML5, CSS, JS (jQuery), Twitter Bootstrap, AJAX, Python, Django Framework, MySQL

Scripts
- Designed python script for IMDB crawling, which shows you the top 100 movies/TV shows at IMDB
- Designed a webpage using Facebook Graph API and AJAX which fetches all the pages liked by any Facebook user

AWARDS
